WHO AM I?

I am a calm and composed sports- and music interested person who is very into all things IT. I am an inventive problem solver, a team player, ambitious and driven. If you would, I'd like to tell you more about myself over a meeting.

WORK EXPERIENCE

- 2020 – **Master Thesis** West Code Solutions
Currently doing my master thesis within the field of Data Science.
Python / Tensorflow / Keras
- 2019 – 2019 summer internship **Software developer** Decerno AB
The project I worked on was centered around image analysis and recognizing objects in images. We conducted our work using popular project management tools such as Jira and BitBucket. We worked in sprints and had sprint planning meetings.
ReactJS + Typescript / C# / OpenCV / Python
- 2018 – 2018 part time + summer job **Database administrator & software developer** Sveriges Annonssörer via Academic Work
Began working here in April as a part time job in parallel with my studies. It resulted in a summer job. It started off as a job where I was supposed to overlook insertion of web page visit statistics. It grew into a different role and I had the opportunity to develop web applications for Sveriges Annonssörer.
PHP / JS / SQL / Wordpress
- 2018 – 2018 part time **Lab assistant Java** Uppsala Universitet
Worked during a 2,5-month period in the beginning of the spring term as a lab assistant in a Java-course. My job was to assist other students with their assignments but also assess their work.
Java /

EDUCATION

- 2015 – 2021 **Master's Degree** Uppsala Universitet
Master Programme in Computer and Information Engineering.
- 2019 – 2020 **Exchange Year** Robert Gordon University, Aberdeen
Exchange from my programme at Uppsala University. Studying Cybersecurity and Network Engineering courses.

GENERAL EXPERIENCE

- 2017 **Bachelor Project** Uppsala Kommun
I and two fellow students did our project for Uppsala Kommun. They had begun converting some of their offices to an activity based workplace. We constructed an indoor positioning system that used the present WiFi-environment to approximate the position of the unit it's run on. We also built a web-interface for the employees to easily see where their coworkers are.
Django / Python
- 2017 **Member of a student committee** UTN
I sat in a committee for UTN(Uppsala Teknolog-och Naturvetarkår) which arranges a gaming event for all interested students. It had 200 participants and my responsibility was to build and maintain the network.

2012

Renovating a Kleinbus 78'

Marks Gymnasium

As a project during my last year in high school, me and a classmate decided to buy and restore a Wolkswagen Kleinbus from 78'. We did everything by ourselves, from removing rust, welding and fixing the engine. We finished the project and the result was such a lift. This project was used as an example project for the coming years after we graduated.

2011

Drivers Licence

LANGUAGES

Swedish - native

English - proficient

HOBBIES

Football - Playing and supporting.

Badminton - Love playing badminton.

Music - Mostly listening, but used to play as well.

Food - Cook, watch shows but most notably to eat.

OTHER EXPERIENCE

Windows/Linux/macOS

Git

Office

Android Studio

Visual Studio
